1. DOCUMENT PURPOSE

The purpose of this document is to outline a Real-time Payment Transmission to FBL from Commerce Plex Limited via API

- Faysal Bank Limited to integrate with Commerce Plex Limited (For A/c to A/c transfers)

1.1. Document Scope

Scope of this document is to provide the specification for the following Real-Time Payment APIs:

- Account Title – Validation of Account (across Pakistan – only IBAN)
- Posting of Payment – instant credit upon successful account validation & successful AML Screening
- Update Payment Status – Verification of Payment Status (Frequency to be added at send side)
- Notification Status – Real-time Transmission of Message to Partner. (Commerce Plex Limited to expose their API).
- Balance Check Service - Commerce Plex Limited Can access their account balance (real-time): this would help Commerce Plex Limited to identify available balance details)

Sr. No.	API Name	Description		URL - API
1	Get Account Title -API	Real-time Title Fetching - A/c to A/c Transfer	Validation of Account through Country Switch rails across Pakistan for PKR Currency only.	URL: https://esbuat.faysalbank.com:3443/services/MiddlewareServices/ESBHrs
2	Single Post Remittance - API	Post of payment to FBL for processing	Transaction Allowed - COC & A/c to Ac Transaction	URL: https://esbuat.faysalbank.com:3443/services/MiddlewareServices/ESBHrs
3	Get Remittance Status	Status update call API where remitting partner can verify payment status real-time		URL: https://esbuat.faysalbank.com:3443/services/MiddlewareServices/FRCTxnInq/StatusInquiry
4	Balance inquiry Service	Balance inquiry calls via API where remitting partner can verify balance of their A/c USD & PKR		URL: https://esbuat.faysalbank.com:3443/MobApp/Service.aspx
5	Notification Service	FBL notifies partners instantly via API: as soon as the payment settled or Paid.		This is automated service where status update request is generated to partner by FBL. Partner API is exposed to FBL for posting status – FBL Payment settlement TAT is 30 seconds average depending on AML CFT screening.

1.2. Service Description

Attribute	Description														
Clearing Houses	1 Link – IBFT payments to beneficiary banks in Pakistan (Real-time)														
Remittance Connectivity Type	<table><tr><td></td><td>APN to Partner</td><td>Partner to Beneficiary Bank</td></tr><tr><td>1 Link – IBFT</td><td>REAL-TIME API</td><td>REAL-TIME API</td></tr></table>		APN to Partner	Partner to Beneficiary Bank	1 Link – IBFT	REAL-TIME API	REAL-TIME API								
	APN to Partner	Partner to Beneficiary Bank													
1 Link – IBFT	REAL-TIME API	REAL-TIME API													
Status Reporting Connectivity Type	<table><tr><td></td><td>Beneficiary Bank To Partner</td><td>Partner To APN</td></tr><tr><td>1 Link – IBFT</td><td>REAL-TIME API</td><td>REAL-TIME API</td></tr></table>		Beneficiary Bank To Partner	Partner To APN	1 Link – IBFT	REAL-TIME API	REAL-TIME API

Field Validation Type	<table><tr><td></td><td>APN Local</td><td>External/Partner</td></tr><tr><td>1 Link – IBFT</td><td>YES</td><td>YES</td></tr></table>		APN Local	External/Partner	1 Link – IBFT	YES	YES								
	APN Local	External/Partner													
1 Link – IBFT	YES	YES													
Speed of Delivery	<table><tr><td></td><td>1 Link – IBFT</td></tr><tr><td>Working Days</td><td>round the clock processing via STP – Real-time (24 x 7 days)</td></tr><tr><td>Business Hours</td><td>00:00 to 23:59 EST</td></tr><tr><td>Cut-off Time</td><td>end of day i.e. 23.00 PM</td></tr></table>		1 Link – IBFT	Working Days	round the clock processing via STP – Real-time (24 x 7 days)	Business Hours	00:00 to 23:59 EST	Cut-off Time	end of day i.e. 23.00 PM						
	1 Link – IBFT														
Working Days	round the clock processing via STP – Real-time (24 x 7 days)														
Business Hours	00:00 to 23:59 EST														
Cut-off Time	end of day i.e. 23.00 PM														
Bank Reconciliation Type	Pre-Fund Model – MT 940 will be relayed to Commerce Plex Limited														
List of Files from Partner	<table><tr><td></td><td colspan="3">File Scheduling Days</td><td rowspan="2">Scheduling Time</td></tr><tr><td></td><td>Business Days</td><td>Weekends</td><td>Holidays</td></tr><tr><td>End of Day (EOD)</td><td>YES</td><td>YES</td><td>YES</td><td>03:00 AM IST</td></tr></table>		File Scheduling Days			Scheduling Time		Business Days	Weekends	Holidays	End of Day (EOD)	YES	YES	YES	03:00 AM IST
	File Scheduling Days			Scheduling Time											
	Business Days	Weekends	Holidays												
End of Day (EOD)	YES	YES	YES	03:00 AM IST											
Purpose of Transaction	Home Remittance – Freelance Payment • USD 25,000 limit, as per SBP Circular EPD Circular Letter No. 03 of 2020 • Purpose of payment will be clearly updated in field “strRemittPurpose” i.e. API: post single remittance.														
Per Transaction Limit	All Home Remittance Payments are processed with no limit to beneficiaries by FBL. However, we do have feature in FBL Remittance system to set the transaction limit and incase a transaction is received beyond the set limit it will be processed via RTGS in office hours The transaction limit would be as per the mutual agreement b/w remitting partner and FBL														
Payout Currencies	Funding: Can be done through USD and deal is settled via TRY - deal conversion mechanism i.e. From USD to PKR. (as per current mechanism for payments under PWP agreement.) Remittance Payouts (PKR Only): All Home Remittance payments are processed to beneficiaries in PKR (PKR Account holders) under SBP guidelines via Straight through processing.														

TAT - Estimated Transaction Processing & Title of account Fetching (STP)	- All Payments are processed to beneficiary across Pakistan via Straight through processing (STP) via 1 link (country switch), having average TAT 30 second to 45 seconds. (based on the successful AML Screening) - Average TAT for Title of Account Fetching is b/w 3 to 15 second - No Manual RTGS Processing
--	--

1.3. Network Connection

Site to Site – VPN or IP Whitelisting

Both sides need to whitelist public IPs of each other, not required in case of VPN connectivity.

(This need to be discussed jointly with Commerce Plex Limited)

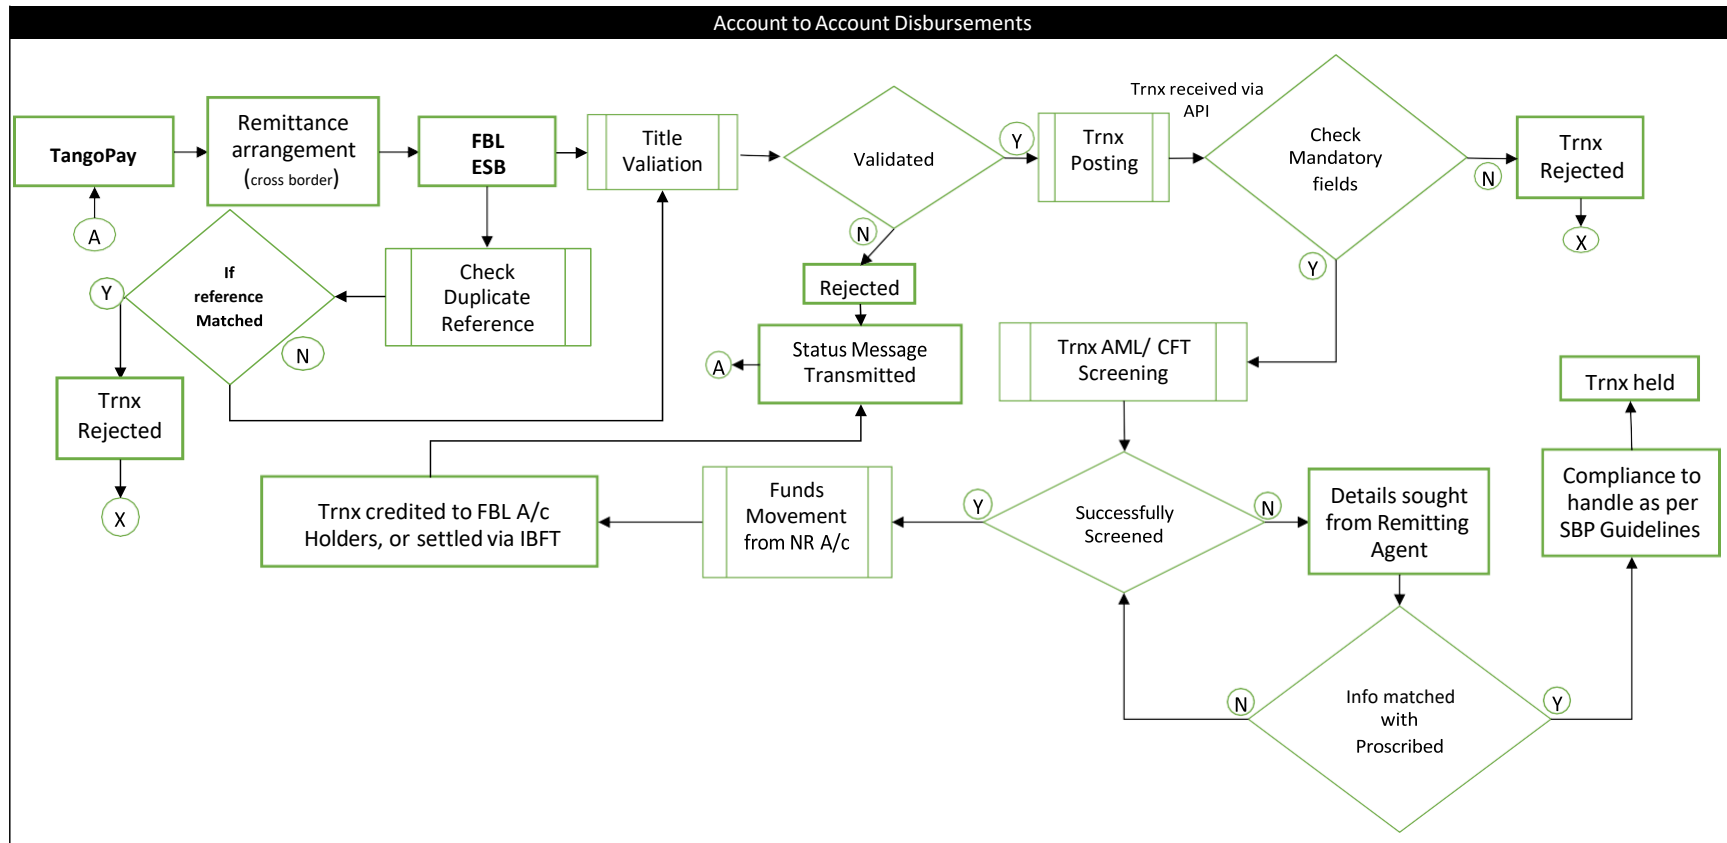

Commerce Plex Limited	
Environment	VPN device
DEV/QA	Commerce Plex Limited to provide address
UAT	Commerce Plex Limited to provide address
PROD	Commerce Plex Limited to provide address

API - System Credential

- **Non-Prod API Credentials:**
 - Username: <Will be Shared Privately>
 - Password: <Will be Shared Privately>
 - Non-Prod API Key: <Will be Shared Privately>
- **Prod API Credentials:**
 - Username: <Will be Shared Privately>
 - Password: <Will be Shared Privately>
 - Prod API Key: <Will be Shared Privately>

2. SYSTEM OVERVIEW

Overview Diagram

3. SPECIFICATION

3.1. Real-time API Specification

This section provides details of the real-time APIs required to be implemented by the Commerce Plex Limited and FaysalBank. The API specification outlined in this section is loosely based on the ISO 20022 standard.

Request and response fields documented for the APIs are minimal set of fields and have been identified based on what is required to complete a payment. APIs can be extended to include additional information fields.

3.2. Echo

```
public String strEchoMsg
    (String strAppID,
     String strADC_TransCode,
     String strDelimiter,
     String strDate,
     String strTime,
     String strNetID,
     String strRefNum,
     String intSTAN,
     String strTranMsg,
     String strToken)
```

3.2.1. Input Parameters

Parameter Name	Description	Fixed Value (F) / Variable Value (V)	Example Value
strAppID	Application ID	F	VC
strADC_TransCode	Txn id	F	02
strDelimiter	Response Delimiter	V	^
strDate	Transaction Date (Format: MMDD)	V	0325
strTime	Transaction Time (HHMISS)	V	183459
strNetID	Network ID	F	VC
intRefNum	Transaction reference number.	V	12345678
intSTAN	System Trace Audit Number (6 digits)	V	123456
strTranMsg	Transaction message type (original/reversal)	F	0200
strToken	Transaction Token	V	7484ee294bfdd1edc5bcc8ba44fb5cdb

3.2.2. Output Parameters

A single String with delimiter will be returned containing following information; if response code is not successful (00) then only response code, response description and approval code will return.

Example

00'Successful txn'123456'Abid Azam

03'System Malfunction'147852

Field Name	Data Type	Example
Response Code	String	00
Response Description	String	Successful Description
Approval Code	String	123456

3.3. Web Method Signature

Each transaction will contain authentication token in-order to validate transaction sanity. The token generation algorithm is defined below.

TranToken: MD5((Tran Date)+(Tran Time)+ (TEST)+(Tran STAN))

Example:

Parameter	Value
Transaction date(MMDD)	1013 (Same Date should be passed in details of Webservices)
Transaction Time (HHMISS)	183459 (Same Time should be passed in detail part of web service)
Pre-Shared Key	TEST
STAN	123456 (STAN should be same in message detail part)

TranToken (In Lower Case): MD5(1013153459TEST123456)

TranToken: 94423fde150a01c1cf74c4a2ec46d67b

The Web Services server would validate the token upon every call; if the token generated does not validate transaction then host would reject the transaction.

3.4. Title Validation – Operation Name “strGetAccountTitle”

Request	Response
<pre> <tem:strGetAccountTitle> <!--Optional:--> <tem:strAppID>TANGO</tem:strAppID> <!--Optional:--> <tem:strADC_Trancode>77</tem:strADC_Trancode> <!--Optional:--> <tem:strDelimiter>^</tem:strDelimiter> <!--Optional:--> <tem:strDate>1113</tem:strDate> <!--Optional:--> <tem:strTime>170503</tem:strTime> <!--Optional:--> <tem:strNetID>FRC</tem:strNetID> <tem:intRefNum>12345678</tem:intRefNum> <tem:intSTAN>123456</tem:intSTAN> <!--Optional:--> <tem:strTranMsg>0200</tem:strTranMsg> <!--Optional:--> <tem:strMerName>FRC</tem:strMerName> <!--Optional:--> <tem:strMCC>4829</tem:strMCC> <!--Optional:--> <tem:strToken>f8f87943b8f2eee403fcd4ae88b1387f</tem:strToken> <!--Optional:--> <tem:strBankName>Faysal Bank Limited</tem:strBankName> <!--Optional:--> <tem:strAccountNo>01102108161001</tem:strAccountNo> <!--Optional:--> <tem:R1>?</tem:R1> <!--Optional:--> </pre>	<pre> strGetAccountTitleResponse xmlns="http://tempuri.org/" <strGetAccountTitleResult>00^Sucessfull Txn^731290^01102108161001</strGetAccountTitleResult> </strGetAccountTitleResponse> </pre>

<pre> <tem:R2>?</tem:R2> <!--Optional:--> <tem:R3>?</tem:R3> <!--Optional:--> <tem:R4>?</tem:R4> </tem:strGetAccountTitle> </pre>	
---	--

3.4.1. Account Title – Get Account Title (API)

This API helps to validate the receiver details before the payment is sent down to the payout partner for fulfillment. Payout Partner should provide validation error details (with error code and error messages) if the payment validation is unsuccessful.

Payout Partner can use the additional information container to send additional receiver information or bank information in the response.

Features of this API:

- End to end Response Time <7 sec
- Returns account name and status
- Optional but recommended API
- For API Switch response time is max 30 sec but usual response time is 1 sec
- If switch is down when Commerce Plex Limited invokes GetAccountTitle API
- If response from this API is mapped with strBankAccountTitle, FBL won't do manual name matching

3.4.1.1. Endpoints

Non-Production: mentioned in the table under point 1.1 Document Scope

Production: mentioned in the table under point 1.1 Document Scope

3.4.1.2. Signature

```

public String strGetTitle
    (string strAppID,
     string strADC_Trancode,
     string strDelimiter,
     string strDate,
     string strTime,
     string strNetID,
     Int32 intRefNum,
     Int32 intSTAN,
     string strTranMsg,
     string strMerName,
     string strMCC,
     string strToken,
     string strBankName,
     string strAccountNo,
     String R1,
     String R2,
     String R3,
     String R4)

```

3.4.1.3. Input Parameters

Parameter Name	Description	Fixed Value (F)/ Variable Value (V)	Example Value	Mandatory (M) / Optional (O)
strAppID	Application ID	F	COMMERCE PLEX LIMITED - FBL to provide	M
strADC_TransCode	Txn id	F	77	M
strDelimiter	Response Delimiter	F	^	M
strDate	Transaction Date (Format: MMDD)	V	0325	M
strTime	Transaction Time (HHMISS)	V	183459	M
strNetID	Network ID	F	FRC	M
intRefNum	Transaction reference number (RIN)	V	12345678 - Commerce Plex Limited to send unique numeric refno for each transaction length 50	M
intSTAN	System Trace Audit Number (6 digits numeri – unique in a day)	V	123456 - The value cannot repeated if strDate and strTime is different; Are there any changes if this can be repeated.	M
strTranMsg	Transaction message type(original/reversal)	F	200	M
strMerName	Merchant Name	F	FRC	M
strMCC	Merchant Category code	F	4829	M
strToken	Transaction Token (to be generated as per API document)	V	7484ee294bfdd1edc5bcc8ba44fb5cdb - Will be generated as per point 3.3 Web Method Signature	M
StrBankCode	Bank Code	F	21 - As per list mentioned in Annexure A	M
strBankName	Bank Name - AS PER BANK LIST	F	Faysal Bank Limited. - As per list mentioned in Annexure A	M
strAccountNo,	Only IBAN	V	PK94FAYS0110101000000000	M
R1	Reserve field 1	V	Reserve for future use	O
R2	Reserve field 2	V	Reserve for future use	O
R3	Reserve field 3	V	Reserve for future use	O
R4	Reserve field 4	V	Reserve for future use	O

3.4.1.4. Output Parameters

A single String with delimiter will be returned containing following information; if response code is not successful (00) then only response code, response description and approval code will return

Example

00^ Successful txn^123456^Abid Azam

03^System Malfunction^147852

Field Name	Data Type	Example
Response Code	String	00
Response Description	String	Successful Description
Approval Code	String	123456
Account Title	String	Abid Azam

3.5. Posting Payment – Operation Name “strPostSingleRemittanceTxn”

Request	Response
<pre> <tem:strPostSingleRemittanceTxn> <!--Optional:--> <tem:strAppID>TANGO</tem:strAppID> <!--Optional:--> <tem:strADC_Trancode>76</tem:strADC_Trancode> <!--Optional:--> <tem:strDelimiter>^</tem:strDelimiter> <!--Optional:--> <tem:strDate>1113</tem:strDate> <!--Optional:--> <tem:strTime>170503</tem:strTime> <!--Optional:--> <tem:strNetID>DMS</tem:strNetID> <!--Optional:--> <tem:strRefNum>MT12345678</tem:strRefNum> <tem:intSTAN>123456</tem:intSTAN> <!--Optional:--> <tem:strTranMsg>0200</tem:strTranMsg> <!--Optional:--> <tem:strMerName>FRC</tem:strMerName> <!--Optional:--> <tem:strMCC>4829</tem:strMCC> <!--Optional:--> <tem:strToken>f8f87943b8f2eee403fcd4ae88b1387f</tem:strToken> <tem:intRemittID>0</tem:intRemittID> <!--Optional:--> <tem:strRemittCode>1</tem:strRemittCode> <!--Optional:--> <tem:strRemitterCode>123456789</tem:strRemitterCode> <!--Optional:--> <tem:strRemitterName>ABID</tem:strRemitterName> <!--Optional:--> <tem:strRemitterCell></tem:strRemitterCell> <!--Optional:--> <tem:strRemitterEmail></tem:strRemitterEmail> <!--Optional:--> <tem:strRemitterAddress1></tem:strRemitterAddress1> <!--Optional:--> <tem:strRemitterAddress2></tem:strRemitterAddress2> <!--Optional:--> <tem:strRemitterPostalCode></tem:strRemitterPostalCode> <!--Optional:--> <tem:strRemitterCity></tem:strRemitterCity> <!--Optional:--> <tem:strRemitterProvince></tem:strRemitterProvince> <!--Optional:--> <tem:strRemitterMessage></tem:strRemitterMessage> <!--Optional:--> <tem:strRemittType></tem:strRemittType> <!--Optional:--> <tem:strRemittanceCurrencyCode>784</tem:strRemittanceCurrencyCode> <tem:intAmount>1</tem:intAmount> <tem:intAmountPKR>27</tem:intAmountPKR> <!--Optional:--> </pre>	<pre> <strPostSingleRemittanceTxnResponse xmlns="http://tempuri.org/"> <strPostSingleRemittanceTxnResult>00^Suce ssfull Txn^058744^MT12345678^Pending Processing^23^</strPostSingleRemittanceTx nResult> </strPostSingleRemittanceTxnResponse> </pre>

<pre> <tem:strAmountWord></tem:strAmountWord> <!--Optional:--> <tem:strRemittCharges>0</tem:strRemittCharges> <!--Optional:--> <tem:strRemittPurpose>HOME remittance</tem:strRemittPurpose> <!--Optional:--> <tem:strBenefIDNOType></tem:strBenefIDNOType> <!--Optional:--> <tem:strBenefIDNO></tem:strBenefIDNO> <!--Optional:--> <tem:strBenefCode></tem:strBenefCode> <!--Optional:--> <tem:strBenefName>01102108161001</tem:strBenefName> <!--Optional:--> <tem:strBenefCellNo>923212609587</tem:strBenefCellNo> <!--Optional:--> <tem:strBenefAddress1></tem:strBenefAddress1> <!--Optional:--> <tem:strBenefAddress2></tem:strBenefAddress2> <!--Optional:--> <tem:strBenefAddress3></tem:strBenefAddress3> <!--Optional:--> <tem:strBenefCity></tem:strBenefCity> <!--Optional:--> <tem:strBenefPostalCode></tem:strBenefPostalCode> <!--Optional:--> <tem:strBenefProvince></tem:strBenefProvince> <!--Optional:--> <tem:strBenefEmail></tem:strBenefEmail> <!--Optional:--> <tem:strBankCode>21</tem:strBankCode> <!--Optional:--> <tem:strBankName>Faysal Bank Limited</tem:strBankName> <!--Optional:--> <tem:strBankAccountNumber>01102108161001</tem:strBankAccountNum ber> <!--Optional:--> <tem:strBankType></tem:strBankType> <!--Optional:--> <tem:strBranchCode></tem:strBranchCode> <!--Optional:--> <tem:strBranchName></tem:strBranchName> <!--Optional:--> <tem:strBranchCity></tem:strBranchCity> <!--Optional:--> <tem:strDisbType>Direct Credit</tem:strDisbType> <!--Optional:--> <tem:strDescription></tem:strDescription> <!--Optional:--> <tem:strTransferType>FT</tem:strTransferType> <!--Optional:--> <tem:strOFACUIDBene></tem:strOFACUIDBene> <!--Optional:--> <tem:strRemarks></tem:strRemarks> <!--Optional:--> <tem:strPickuplocation></tem:strPickuplocation> <!--Optional:--> </pre>

3.5.1. Post Single Remittance Transaction (COMMIT API)

This API helps the partner i.e. Commerce Plex Limited to send down the payment instructions to Faysal Bank. Payment instructions shall be validated at ESB level and token will be checked. After this payment shall fall under FRC for processing and go-through compliance screening in OFAC & UNSC list, upon successful screening payment will be disbursed to beneficiary account, either in FBL or other bank via country switch i.e. 1LINK. This entire processing of payment via Straight through Processing (STP) shall be performed within 30 to 45 seconds period.

After the processing of payment via STP, FBL generate real-time notifications to Commerce Plex Limited and update the status accordingly. In case a timeout occurs, Get Remittance Transactions (QueryPaymentStatus) API will be invoked before retrying commit call (only for failed or not found responses).

STP will be available round the clock 24 x 7 and process payments in real-time. However, up time of STP is dependent on availability of beneficiary bank via country switch.

In case, payments are processed with same reference ID i.e. RIN then payment will be considered as duplicate payment and will be rejected upfront. API will send response message of "04-Duplicate RIN" for rejection of payment. Commerce Plex Limited needs to build control / configure at their end to ensure no reference ID's are not duplicated.

3.5.1.1. Endpoints

Non-Production: mentioned in the table under point 1.1 Document Scope

Production: mentioned in the table under point 1.1 Document Scope

Response Time: <10 sec

3.5.1.2. Signature

3.5.1.3. Input Parameters

Parameter Name	Description	Fixed Value (F)/ Variable Value (V)	Format	Mandatory	Faysal Filed Length
strAppID	Application ID	F	COMMERCE PLEX LIMITED - FBL to provide	Yes	varchar Character 10
strADC_TransCode	76	F	76	Yes	
strAgentID	Sender Institution ID	F	COMMERCE PLEX LIMITED	Yes	varchar Character 10
strDate	Transaction Date (Format: MMDD)	V	0325	Yes	8 Character Format: MMDD
strTime	Transaction Time (HHMISS)	V	183459	Yes	6 Character HHMISS
strNetID	This is for Channel at the Sender (Mobile/Netbanking /Branch/IVR).	F	FRC/Direct Integration /Mobile App/IVR /internet Banking	Yes	varchar Character 150
strRefNum	Transaction reference number. (This should be unique number)	V	12345678	Yes	50 Character Type VAR CHAR
strTranMsg	Transaction message type(original/reversal)	F	0200	Yes	Fixed value to be received
strMerName	FRC	F		Yes	
strToken	Token to be generated as MD#5	V	<i>Token generation function is mentioned hereunder 3.3 Web Method Signature</i>	Yes	
intSTAN	System Trace Audit Number (6 digits)	V	123456	Yes	ok - FBL shall

					managed internally
strRemittCode	Identification document No. Passport, license or Emirates ID, social security Card no – Compliance screening requirement	V	Regulatory requirement Commerce Plex Limited to relay ID mentioned at their end	Yes	varchar Character 150
strRemitterName	Remitter Name	V	Muhammad Ammar - <i>Special characters not allowed.</i>	Yes	varchar Character 150
strRemitterCell	Remitter Cell Number	V	0015512250000		
strRemitterEmail	Remitter Email Address	V	danishmateen@faysalbank.com	Yes	varchar Character 150
strRemitterAddress1	Remitter Date of Birth	V	01-01-1990	Yes	varchar Character 150
strRemitterAddress2	Remitter Place of Birth	V	Karachi	Yes	varchar Character 150
strRemitterCity	Remitter City to be mapped by Commerce Plex Limited	V	Compliance field	Yes	varchar Character 150
strRemitterProvince	Remitter Country Name to be mapped by Commerce Plex Limited	V	Compliance field	Yes	varchar Character 150
strRemittanceCurrencyCode	ISO currency code UAE Dirham: 784 Pakistani Rupee: 586 US Dollar: 840	V	784	Yes	varchar Character 150
IntAmount	FCY amount Is required	V	78.6	Yes	Float
intAmountPKR	Amount in PKR currency	V	20000 - 2 Digits after decimal would be accepted	Yes	float
strRemittCharges	This will be zero, in case there is any charges you should provide us.	F	0	Yes	varchar Character 150
strRemittPurpose	Home remittance – Freelance Payment	F	Should be Freelance payment as per SBP Circular	Yes	varchar Character 150
strBeneName	This field would be mapped with the account title that received by Commerce Plex Limited via APIGetaccount title	V	MUHAMMAD ASGHAR TF values is to be replicated	Yes	varchar Character 150
strBeneCellNo	Beneficiary Cell Number	V	923212609587	Yes	varchar Character 150
strBeneAddress1		V		Yes	varchar Character 150
strBeneAddress2		V		Yes	varchar Character 150
strBankCode	Bank List has been provided	V	21 is FBL code; whereas for other banks, please refer list mentioned in Annexure A	Yes	varchar Character 150

strBankName	Bank List will be provided	V	Faysal Bank Limited. - <i>whereas for other banks, Please refer list mentioned in Annexure A</i>	Yes	varchar Character 150
strBankAccountNumber	Only IBAN	V	PK94FAYS011010100000000	Yes	varchar Character 150
strBankAccountTitle	This field would be mapped with the account title that received by Commerce Plex Limited via API Getaccounttitle	V	TF values is to be replicated	No	varchar Character 150
strDisbType	Mode of disbursement - For FBL A/c: Direct Credit - For Other Bank A/c: Other Credit	F	Other Credit or Direct Credit	Yes	varchar Character 150
strTransferType	For Faysal Transfer - FT For Other Bank Transfer - IBFT	F	FT or IBFT	Yes	

3.5.1.4. Output Parameters

A single String with delimiter will be returned containing following information; if response code is not successful (00) then only response code, response description and approval code will return

Example

00'Successful txn'123456'22222555' Pending Processing'23' Instruction Added

Successfully

03'System Malfunction'147852

04^Duplicate RIN is not allowed.^234761 - SOAP parameter is attached

Field Name	Data Type	Example
Response Code	String	00
Response Description	String	Successful Description
Approval Code	String	123456
Reference Number	String	22222555
Status	String	Pending Processing
StatusID	String	23
Info	String	Instruction Added Successfully

3.6. Getting Payment – Operation Name “strGetRemittanceTxn”

Request	Response
<pre> soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/" xmlns:tem="http://tempuri.org/" <soapenv:Header/> <soapenv:Body> NS1:strGetRemittanceTxn xmlns:NS1="http://tempuri.org/" <NS1:strAppID>TANGO</NS1:strAppID> <NS1:strADC_Trancode>78</NS1:strADC_Trancode> <NS1:strDelimiter>?</NS1:strDelimiter> <NS1:strDate>0512</NS1:strDate> <NS1:strTime>170545</NS1:strTime> <NS1:strNetID>HAP</NS1:strNetID> <NS1:intRefNum>1212</NS1:intRefNum> <NS1:intSTAN>15</NS1:intSTAN> <NS1:strTranMsg>0200</NS1:strTranMsg> <NS1:strMerName>HAP</NS1:strMerName> <NS1:strMCC>4299</NS1:strMCC> <NS1:strToken>ce5d63af138eda6f4afbf5d857c0af4e</NS1:strToken> <NS1:strFromDate>05/10/2020</NS1:strFromDate> <NS1:strToDate>07/23/2020</NS1:strToDate> <NS1:strRefNumber>MT12345679</NS1:strRefNumber> <NS1:dtTranDetail></NS1:dtTranDetail> <NS1:R1>?</NS1:R1> <NS1:R2>?</NS1:R2> <NS1:R3>?</NS1:R3> <NS1:R4>?</NS1:R4> </NS1:strGetRemittanceTxn> </soapenv:Body> /soapenv:Envelope </pre>	<pre> <NS1:Envelope xmlns:NS1="http://schemas.xmlsoap.org/soap/envelope/" > <NS1:Body> <NS2:strGetRemittanceTxnResponse xmlns:NS2="http://tempuri.org/" > <NS2:strGetRemittanceTxnResult>00^Successful Txn^14877</NS2:strGetRemittanceTxnResult> <NS2:dtTranDetail> <Table> <AgentID>TANGO </AgentID> <TransactionDate>2020-07- 22T18:23:54.687</TransactionDate> <TransactionReference>MT12345679</TransactionRefer ence> <Beneficiaryname>01102108161001</Beneficiaryname> <Sendername>ABID</Sendername> <Disbursementtype>Direct Credit</Disbursementtype> <TransactionStatus>Paid</TransactionStatus> <StatusID>10</StatusID> <Remarks>Not Match in UNSC List.</Remarks> </Table> </NS2:dtTranDetail> </NS2:strGetRemittanceTxnResponse> </NS1:Body> </NS1:Envelope> </pre>

3.6.1. Get Remittance Transaction

This API is used to notify the status of remittances transactions remitted for payment to other financial institutions, notification will be one to one. Commerce Plex Limited can call status update and verify payment status in real-time.

3.6.1.1. Endpoints

Non-Production: mentioned in the table under point 1.1 Document Scope

Production: mentioned in the table under point 1.1 Document Scope

Response Time: TBD

FBL provides functionality to pull status of multiple transactions between given from date and to date, but these fields are optional

- Commerce Plex Limited will always request status for a particular transaction

3.6.1.2. Signature

```
public String strGetRemittanceTxn
(
    string strAppID,
    string strADC_TransCode,
    string strDelimiter,
    string strDate,
    string strTime,
    string strNetID,
    Int32 intRefNum,
    Int32 intSTAN,
    string strTranMsg,
    string strMerName,
    string strMCC,
    string strToken,
    string strFromDate,
    string strToDate,
    string strRefNumber,
    ref DataTable dtTranDetail,
    String R1,
    String R2,
    String R3,
    String R4)

```

3.6.1.3. Input Parameters

Parameter Name	Description	Fixed Value (F)/ Variable Value (V)	Example Value	Optional /Mandatory
strAppID	Application ID	F	FRC	M
strADC_TransCode	Txn id	F	78	M
strDelimiter	Response Delimiter	V	^	M
strDate	Transaction Date (Format: MMDD)	V	0325	M
strTime	Transaction Time (HHMISS)	V	183459	M
strNetID	Network ID	F	FRC	M

intRefNum	Transaction reference number (RIN)	V	12345678	M
intSTAN	System Trace Audit Number (6 digits)	V	123456	M
strTranMsg	Transaction message type(original/reversal)	F	0200	M
strMerName	Merchant Name	F	FRC	M
strMCC	Merchant Category code	F	4829	M
strToken	Transaction Token	V	7484ee294bfdd1edc5bcc8ba44fb5cdb	M
strFromDate	From Date (YYYY-MM-DDT HH:MI:SS)	V	2020-09-02T21:30:02 This will be Pakistan Time Zone	M
strToDate	To Date (YYYY-MM-DDT HH:MI:SS)	V	2020-09-03T21:30:02 This will be Pakistan Time Zone	M
strRefNumber	Transaction reference number, if this field is empty then only specific transaction will return	V	1225558555	M
R1	Reserve field 1	V	Reserve for future use	O
R2	Reserve field 2	V	Reserve for future use	O
R3	Reserve field 3	V	Reserve for future use	O
R4	Reserve field 4	V	Reserve for future use	O

3.6.1.4. Output Parameters

A single String with delimiter will be returned containing following information; if response code is not successful (00) then only response code, response description and approval code will return.

Data table (dtTranDetail) will also be return as a ref parameter. Following is the structure and sample data.

AgentID	Transaction Date	Transaction Reference / RIN	Beneficiary name	Amount (PKR)	Beneficiary account #	Beneficiary bank	Sender name	Disbursement type	Transaction Status	Status ID	Remarks
TANGOPAY	2016-10-07 18:19:03.460	123456584559	0002000001100199	600000	0002000001100199	Model Bank	Abid	Other Credit	Pending IRIS	29	Not Match in UNSC

Example

00^ Successful txn^123456^5

03^System Malfunction^147852

Field Name	Data Type	Example
Response Code	String	00
Response Description	String	Successful Description
Approval Code	String	123456
Number of Records	String	5

3.7. Balance Inquiry Service – Operation Name “strRBAvailBal”

Request	Response
<pre> <NS1:strRBAvailBalRequest> <NS1:strAppID>TANGO</NS1:strAppID> <NS1:strADC_Trancode>457</NS1:strADC_Trancode> <NS1:strDelimiter>?</NS1:strDelimiter> <NS1:strDate>0512</NS1:strDate> <NS1:strTime>170545</NS1:strTime> <NS1:strNetID>HAP</NS1:strNetID> <NS1:strRefNum>1212</NS1:strRefNum> <NS1:strSTAN>15</NS1:strSTAN> <NS1:strTranMsg>0200</NS1:strTranMsg> <NS1:strMerName>HAP</NS1:strMerName> <NS1:strMCC>4299</NS1:strMCC> <NS1:strToken>805999c9b81d2aa7c6fbb069a0d914f9</NS1:strToken> <NS1:strAccNum>01100640098057</NS1:strAccNum> <NS1:R1/> <NS1:R2/> <NS1:R3/> <NS1:R4/> </NS1:strRBAvailBalRequest> </pre>	<pre> <NS1:strRBAvailBalResponse xmlns:NS1="http://tempuri.org/"> <NS1:strAvailBal>34149785.66</NS1:strAvailBal> <NS1:strCCY>PKR</NS1:strCCY> <NS1:strRBAvailBalResult>00?Successful Transaction?20533</NS1:strRBAvailBalResult> </NS1:strRBAvailBalResponse> </pre>

3.7.1. Balance Inquiry Service

Commerce Plex Limited can verify their account balance of USD and PKR accounts using this API.

3.7.1.1. Endpoints

Non-Production: mentioned in the table under point 1.1 Document Scope

Production: mentioned in the table under point 1.1 Document Scope

3.8. Notification Service

This API helps to send notification for transaction status to Commerce Plex Limited. FBL shall send a push notification to Commerce Plex Limited about the change in status of transaction at every stage.

Note: this API is completely depended on Commerce Plex Limited’s API and parameters that are exposed to FBL. Based on this, FBL shall make developments accordingly.

This need to be discussed in detail, so that we may lock the development accordingly at FBL end and this would require joint testing at both end.

Notification will be relayed by FBL instantly as soon as the payment is PAID at FBL End.

Sample message that is relayed to Partners:

RemittanceNotification Send :: Old StatusID : 9, Old StatusName : Ready To Disbursement, Changes to New StatusID : 10, New StatusName : Paid, Response Recieved : 00^Successful txn^628444

Ref ID 123465

Client Name or Credential API

4. UPDATE PAYMENT STATUS API

This API will be used by the payout partner to push / update the status updates of a payment received by payout partner from Commerce Plex Limited. Payout partner will expose their API to push periodic status updates (real-time) until the payment is eventually delivered / rejected / returned.

5. QUERY PAYMENT STATUS API

Method used to notify the status of remittances transactions remitted for payment to other financial institutions, notification will be one to one. The present method will be published by the remittance company.

6. PAYMENT PROCESSING

6.1. Straight Through Processing (STP)

FBL process all payments round the clock 7 days a week, even on public holidays.

6.2. Manual Processing

FBL shall not process any transaction of Commerce Plex Limited manually. All transactions that are failed to process via STP shall be rejected and returned to Commerce Plex Limited on subsequent working day. – Manual Processing need to be discussed.

7. System Downtime

If any outage from FBL/Switch

7.1. Planned Outage:

- a. FBL Ops team to inform Commerce Plex Limited- Ops team over an email

7.2. Unplanned Downtime:

- a. Commerce Plex Limited will receive timeout error / system error
- b. Commerce Plex Limited will retry those transactions after 15 min (configurable and editable) each for up to 5 times and then will contact FBL Ops team
