Document Number	OI-20250912
Document status	PUBLISHED
Document owner	@Rizwan Zaffar @Arsalan Pervez @Muhammad Taimoor
Solutions Architect	@Maqsood Ali @Owais Khalid @Saqlain Raza
Project Manager	@Rashid Raees
Priority	HIGH
Region	Bangladesh
Operator	BKash
Product	PAYIN TOKENIZATION

Product Checklist

Testing Credentials

```
1 "version": "1.0.0",
2   "timestamp": "2025-09-10 19:03:03",
3   "merchantShortCode": "60044",
4   "signature": "<Create via Signature Code .Zip file>"
```

Testing Number

Number	01824732735
OTP	123456
PIN	12121

Base URL: <https://sandboxdc.pay.bka.sh/capabilitycore/v2/>

 IP Whitelisting is required for this, Current whitelisted IPs are mentioned below:

110.93.241.250
125.209.82.254
202.47.38.156
103.86.55.56

13.215.165.235

39.34.131.65

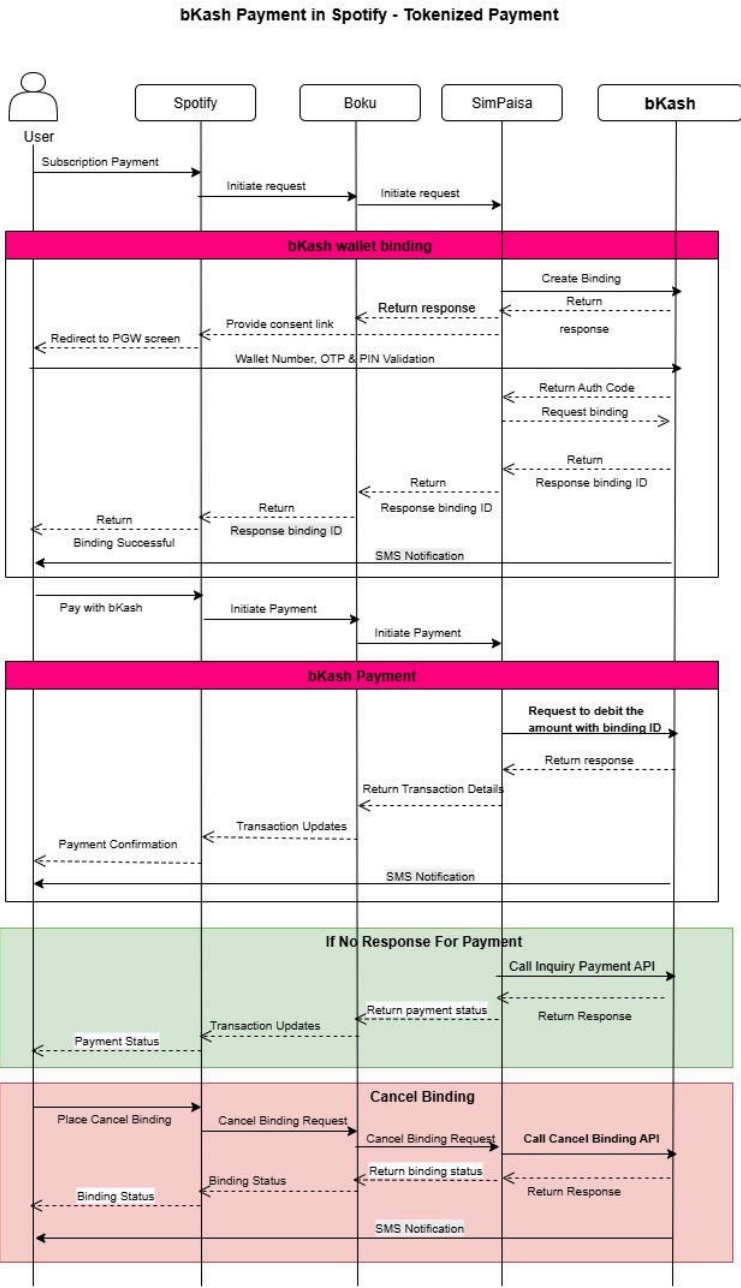

User Flow

1. Selects to bind bKash account at merchant website/app
2. Merchant platform will initiate a Direct Charge Mandate/Consent/binding request to bKash via API.
3. bKash will provide customer consent URL.
4. Merchant will redirect customer to a bKash UI. The Terms & Conditions for Direct Charge are displayed. It will be elaborate and specific about customer's consent.
5. Customer provides consent for binding ,Agrees to terms and conditions ,Enters wallet number ,Enters OTP and Enters PIN.

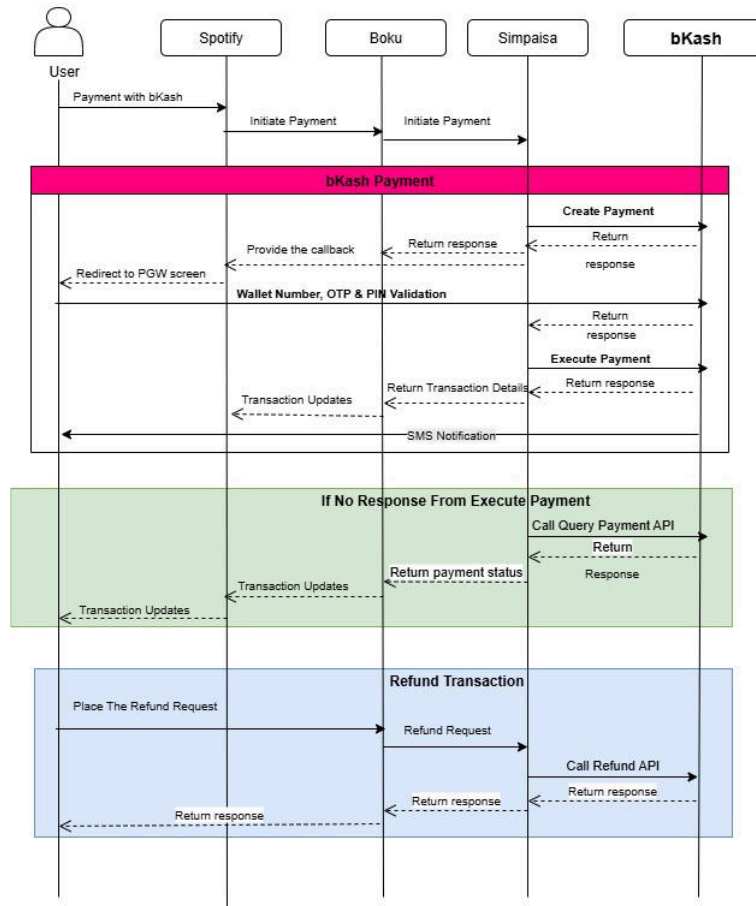

6. Customer completes the account binding steps and is redirected to merchant site/APP .
7. Customer receives confirmation SMS from bKash system for account binding.

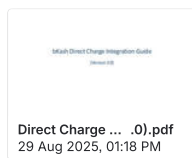

Sequence Diagram

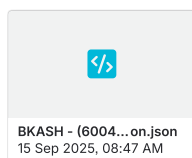

bKash Payment in Spotify - One Time Payment

API Documentation

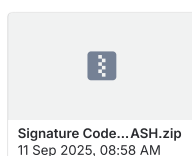

✖ While testing we have found discrepancies in the API documentation and postman collection. The tested postman collection is attached below.

To conduct live testing remove **/test** from the postman collection URLs.

To conduct live testing you would need to create signature, as per the ZIP file attached below.

i In Response body, All Params marked as Mandatory “M” will be available in both Failure and Success cases, however Params marked as Conditional “C” will be available only in Success Cases.

Prepare API

Description: This API would do customer binding via Bkash, once the steps are completed on Bkash UI merchant would then receive binding **auth_code**.

METHOD : **POST**

Endpoint: {Base Uri}/[oauths/prepare](#)

REQUEST Parameters

TYPE	Data Type	Mandatory	PARAMETERS	Sample Values	Fixed/Variable	Description
HEADER	String	M	version	1.0.0	F	Version Number indicates the interface version.
HEADER	Number	M	timestamp	2021-05-14 19:03:03	V	UTC Instant
HEADER	Instant	M	merchant ShortCode	017#####002	V	Unique Code for Merchant
HEADER	String	M	signature	UB+vLRQv1+1v7ubIST41VyUZ8P+IxxQDqAfSKr7AnlcN4XPOpFaQfsFdkRbopscqh9QWilwx24Oa49eXOpA0jjgbMJvMPi75JM6hHwGgWdSOiHVEw56ZTqpNAkck74KNqDvG2Q75eus/0tK9dwyIsTw1Ik8ZxPRLVJc3IobOSwWqrt9nDnz/lvjA1kP4Z2oac69BSyVvtSgloaIdVUgCIG6izKc20IaM0pXJfj1vZUKh6+iy7AwlkHQgKMefwj/QlQxxt5I9QsBa1q8Y/WHYNuJIIOhdyBaN0sclSlcP3WTlgjRdwIM7gKOnoUfKxgtZ3kKjfGhMPRhKVx6gYGSWlg==	V	Encrypted, Signature should be matched

Parameter	Data Type	Mandatory	Sample	Fixed/V ariable	Remarks	Description
customerBelongsTo	String	M	<bKash>	F	Pre-shared by bKash	Fixed Value; Reserved for future use
merchantId	Number	M	<MERC_017#####002>	F	Pre-shared by bKash	Merchant Client ID which is unique for different merchant
merchantRedirectUrl	String	M	< https://www.merchant.com >	V	Provided by merchant	Merchant Redirect URL
scopes	String	M	[AGREEMENT_PAY, USER_INFO]	F	Pre-shared by bKash	Fixed Value; Merchant to give this scope, otherwise mandate will be created but customer can't pay and merchant can't get user information
authState	String	M	<DEFAULT>	F	Pre-shared by bKash	Fixed Value; Reserved for future use

RESPONSE Parameters

Parameters		Data Type	Mandatory	Sample Values	Remarks
result	resultStatus	String	M	<S>	Indicate result status
	resultCode	String	M	<SUCCESS>	Indicate result code
	resultMessage	String	M	<success>	Indicate result description
authUrl		String	C	http://13.250.231.206:9006/dc-ui/index.html?hashCode=eHVuaTE2Mjk0MjQwNzg5MTNodHRwc3d3dy5iYWlkS5jb201M	bKash Redirect URL will be generated in case of success. After redirecting to

					DEzMTY4OA&redirectUri=https://www.merchant.com&authClientId=xuni&referenceClientId=xuni>	the success URL, you will be able to extract authCode from the URL which would be required later in the Apply Token API .
extendInfo	AC_INFO	customerBelongsTo	String	C	bKash	Reserved for future use
		env		C		Reserved for future use

Response Codes

 bKash Payment Gateway API operation can return different error codes, subject to corresponding failure scenario.

Response Code	Description
2001	Invalid App Key
2002	Invalid Payment ID
2003	Process failed
2004	Invalid firstPaymentDate
2005	Invalid frequency
2006	Invalid amount
2007	Invalid currency
2008	Invalid intent
2009	Invalid Wallet
2010	Invalid OTP
2011	Invalid PIN
2012	Invalid Receiver MSISDN
2013	Resend Limit Exceeded
2014	Wrong PIN
2015	Wrong PIN count exceeded
2016	Wrong verification code
2017	Wrong verification limit exceeded
2018	OTP verification time expired
2019	PIN verification time expired
2020	Exception Occurred

2021	Invalid Mandate ID
2022	The mandate does not exist
2023	Insufficient Balance
2024	Exception occurred
2025	Invalid request body
2026	The reversal amount cannot be greater than the original transaction amount
2027	The mandate corresponding to the payer reference number already exists and cannot be created again
2028	Reverse failed because the transaction serial number does not exist
2029	Duplicate for all transactions
2030	Invalid mandate request type
2031	Invalid merchant invoice number
2032	Invalid transfer type
2033	Transaction not found
2034	The transaction cannot be reversed because the original transaction has been reversed
2035	Reverse failed because the initiator has no permission to reverse the transaction
2036	The direct debit mandate is not in Active state
2037	The account of the debit party is in a state which prohibits execution of this transaction
2038	Debit party identity tag prohibits execution of this transaction
2039	The account of the credit party is in a state which prohibits execution of this transaction
2040	Credit party identity tag prohibits execution of this transaction
2041	Credit party identity is in a state which does not support the current service
2042	Reverse failed because the initiator has no permission to reverse the transaction.
2043	The security credential of the subscriber is incorrect.

2044	Identity has not subscribed to a product that contains the expected service or the identity is not in Active status.
2045	The MSISDN of the customer does not exist.
2046	Identity has not subscribed to a product that contains requested service.
2047	TLV Data Format Error
2048	Invalid Payer Reference
2049	Invalid Merchant Callback URL
2050	Agreement already exists between payer and merchant
2051	Invalid Agreement ID
2052	Agreement is in incomplete state
2053	Agreement has already been cancelled
