REST BASED WEB SERVICE INTEGRATION

Objective:

Exchange houses can integrate their system with HabibMetro Bank (HMB) to Send, Inquiry, Update or Query the transactions via HMB Rest-based Web Service.

Intended Audience:

It is assumed programmers are familiar with the Rest-based web service. This document does not include general information about web service; it includes the details of integration with API along with

Input/output parameters.

Detail Description:

To develop an API that can be given to exchange houses to process the files from their end on live environment that will include cash payment, LFT, IBFT & RTGS payments.

Account title verification will be given to the MSBs for LFT & IBFT payments that beneficiary account can be validated on real time while booking the payment. The process will work 24/7 for cash over counter and account transfer payments. RTGS will allowed as per timelines given by regulator.

This document describes about 13 API methods needed for receiving payment integration.

- Generate OTP Service
- Verify OTP Service
- Cash Over Counter Service
- Direct Cash Over Counter Service
- Amend Beneficiary name of COC transaction Service
- COC Transaction Cancellation Service
- Local Funds Transfer (Title fetch) Service
- Local Funds Transfer (Lodge Advise) Service
- Inter Bank Funds Transfer (Title fetch) Service
- Inter Bank Funds Transfer (Lodge Advise) Service
- Balance Inquiry
- Transaction Status Inquiry
- M-Wallet Title Fetch Service
- M-Wallet Lodge Advise Service
- Title Fetch Service
- Lodge Advice Service

1. GENERATE OTP SERVICE

URL: <https://{Server}:{PORT}/Generateotp/>

Method: POST

Input Parameters

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	Company unique id will be shared shared by the Bank	Positive non-zero integer value
agentId	Alpha Numeric	Remitting company's agent unique id	30

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	As a response same company id will be send which was send in request.	Positive non-zero integer value
agentId	Alpha Numeric	As a response same agentId will be send which was send in request.	30
otp	Numeric	OTP will be generated	5

Sample Request and Response

REQUEST	RESPONSE
<pre>{ "companyId":1, "agentId":"2" }</pre>	<pre>{ "companyId": 1, "agentId": "2", "otp": 52444 }</pre>

2. VERIFY OTP SERVICE

URL: `https://{Server}:{PORT}/verifyotp/`

Method: POST

Input Parameters

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	Company unique id will be shared by the Bank	Positive non-zero integer value
agentId	Alpha Numeric	Remitting company's agent unique id	30
otp	Numeric	The otp generated will be provided here	5

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
token	Alpha Numeric	Token will be generated on successful authentication

Sample Request and Response

REQUEST	RESPONSE
<pre>{ "companyId": 1, "agentId": "2", "otp": 52443 }</pre>	<pre>{ "token": "" }</pre>

3. CASH OVER COUNTER SERVICE

URL: <https://{Server}:{PORT}/Coc/transaction>

Method: POST

Input Parameters

*Token will be sent in Authentication parameter

FIELD NAME	FIELD TYPE	MANDATORY	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	yes	Company ID is unique ID assigned to each company by the bank.	
remittercompanyName	Alpha Numeric	yes	Remitting company's name	12
transactionCode	Alpha Numeric	yes	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN	30
remitteridnoType	Alpha Numeric	yes	This field could be used to supply remitter ID number Type such as Passport Number / Work Permit e.t.c.	20
remitterId	Alpha Numeric	yes	This field could be used to supply unique remitter ID.	20
remitterCode	Alpha Numeric	No	Any Unique number assigned to the Remitter by the Agent.	15
remitterDob	Alpha Numeric	No	This field could be used to supply remitter DOB . Date Format : dd-MM-yyyy	10
remitterPob	Alpha Numeric	No	This field could be used to supply remitter POB	30
remitterName	Alpha Numeric	yes	Full Name of Remitter. Remitter Name should not be empty. If empty remitter name is supplied API will return response Missing remitter Name.	60
remitterfatherName	Alpha Numeric	No	This field could be used to supply remitter Father Name.	60
remitterCell	Alpha Numeric	No	Remitter Cell Number	15
remitterEmail	Alpha Numeric	No	Remitter Email Address	30
remitterAddress1	Alpha Numeric	No	Remitter Address Line 1	100

remitterAddress2	Alpha Numeric	No	Remitter Address Line 2	100
remitterpostalCode	Alpha Numeric	No	Remitter Postal Code	5
remitterCity	Alpha Numeric	No	Remitter City Name	50
remitterAgent	Alpha Numeric	No	Agent unique provided	30
remitterProvince	Alpha Numeric	No	Remitter Province / State Name	30
remitterMessage	Alpha Numeric	No	This field could be used to send any message sent by Remitter	60
remitterCNIC	Alpha Numeric	No		13
remitteraccountNumber	Alpha Numeric	No	This field could be used to supply account number used by the remitter for remitting the funds.	24
remittancecurrencyCode	Alpha Numeric	yes	Currency Code of Remitting Currency ISO Standard	3
remittingAmount	Numeric	No	Amount in Remitting Currency	16
amountPkr	Numeric	yes	Amount to be paid to Beneficiary in Pak Rupees. Amount PKR should not be empty, if empty amount is supplied, API will return response Invalid amount. Amount PKR should be in numeric format. If non-numeric characters other than decimal are supplied in Amount PKR API will return invalid amount format. Amount PKR value should be greater than zero. If value is not greater than zero API will return response Invalid Amount	16
amountinWord	Alpha Numeric	No	Amount in Words	100
remittCharges	Numeric	No	Remittance charges charged from Remitter	16
remittPurpose	Alpha Numeric	yes	Purpose of Remittances “Message Should be Hardcore as “Home Remittance”	30
senderCountry	Alpha Numeric	yes	Transaction Originating Country	50
beneidnoType	Alpha Numeric	No	Type of ID for beneficiary (e.g. Passport / CNIC etc.)	20
beneIdno	Alpha Numeric	No	Beneficiary Identification Number	20
benName	Alpha Numeric	yes	Full Name of Beneficiary as per their ID / Title of Account.	60

benFathurname	Alpha Numeric	No	This field could be used to supply beneficiary's father name.	60
beneCellno	Alpha Numeric	No	Beneficiary Cell Number	15
beneAddress1	Alpha Numeric	No	Beneficiary Address Line 1	100
beneAddress2	Alpha Numeric	No	Beneficiary Address Line 2	100
beneAddress3	Alpha Numeric	No	Beneficiary Address Line 3	100
beneDob	Alpha Numeric	No	This field could be to supply Beneficiary Date of Birth Date Format : DD-MM-YYYY	10
benePob	Alpha Numeric	No	This field could be to supply Beneficiary Place of Birth	30
beneCity	Alpha Numeric	No	Beneficiary City Name	30
beneProvince	Alpha Numeric	No	Beneficiary Province	30
beneEmail	Alpha Numeric	No	Beneficiary Email Address	30
beneBankcode	Alpha Numeric	No	Beneficiary Bank Code as per 1 Link List (Attached)	10
beneBankname	Alpha Numeric	No	Name of Bank where Beneficiary Account is maintained E.g.,	30
bankAccountnumber	Alpha Numeric	No	Beneficiary Account Number For COC this should be empty string.	24
transactionDescription	Alpha Numeric	No	Transaction Description	30
remarks	Alpha Numeric	No		30
remitTime	Alpha Numeric	No	Format:Feb-20-2023 10:08:23 AM	25

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
requestNumber	Numeric	A request number will be generated to identity each transaction
responseCodeDesc	Alpha Numeric	For Response Message Refer to Appendix A
companyId	Numeric	As a response same company id will be send which was send in request.

4. DIRECT CASH OVER COUNTER SERVICE

URL: <https://{Server}:{PORT}/Coc/fin-transaction>

Method: POST

Input Parameters

0.*Token will be sent in Authentication parameter

FIELD NAME	FIELD TYPE	MANDATORY	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	yes	Company ID is unique ID assigned to each company by the bank.	
remittercompanyName	Alpha Numeric	yes	Remitting company's name	12
transactionCode	Alpha Numeric	yes	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN	30
remitteridnoType	Alpha Numeric	yes	This field could be used to supply remitter ID number Type such as Passport Number / Work Permit e.t.c.	20
remitterId	Alpha Numeric	yes	This field could be used to supply unique remitter ID.	20
remitterCode	Alpha Numeric	No	Any Unique number assigned to the Remitter by the Agent.	15
remitterDob	Alpha Numeric	No	This field could be used to supply remitter DOB . Date Format : dd-MM-yyyy	10
remitterPob	Alpha Numeric	No	This field could be used to supply remitter POB	30
remitterName	Alpha Numeric	yes	Full Name of Remitter. Remitter Name should not be empty. If empty remitter name is supplied API will return response Missing remitter Name.	60
remitterfatherName	Alpha Numeric	No	This field could be used to supply remitter Father Name.	60

remitterCell	Alpha Numeric	No	Remitter Cell Number	15
remitterEmail	Alpha Numeric	No	Remitter Email Address	30
remitterAddress1	Alpha Numeric	No	Remitter Address Line 1	100
remitterAddress2	Alpha Numeric	No	Remitter Address Line 2	100
remitterpostalCode	Alpha Numeric	No	Remitter Postal Code	5
remitterCity	Alpha Numeric	No	Remitter City Name	50
remitterAgent	Alpha Numeric	No	Agent unique provided	30
remitterProvince	Alpha Numeric	No	Remitter Province / State Name	30
remitterMessage	Alpha Numeric	No	This field could be used to send any message sent by Remitter	60
remitterCNIC	Alpha Numeric	No		13
remitteraccountNumber	Alpha Numeric	No	This field could be used to supply account number used by the remitter for remitting the funds.	24
remittancecurrencyCode	Alpha Numeric	yes	Currency Code of Remitting Currency ISO Standard	3
remittingAmount	Numeric	No	Amount in Remitting Currency	16
amountPkr	Numeric	yes	Amount to be paid to Beneficiary in Pak Rupees. Amount PKR should not be empty, if empty amount is supplied, API will return response Invalid amount. Amount PKR should be in numeric format. If non-numeric characters other than decimal are supplied in Amount PKR API will return invalid amount format. Amount PKR value should be greater than zero. If value is not greater than zero API will return response Invalid Amount	16
amountinWord	Alpha Numeric	No	Amount in Words	100
remittCharges	Numeric	No	Remittance charges charged from Remitter	16
remittPurpose	Alpha Numeric	yes	Purpose of Remittances as “Home Remittance”	30
senderCountry	Alpha Numeric	yes	Transaction Originating Country	50
beneidnoType	Alpha Numeric	No	Type of ID for beneficiary (e.g. Passport / CNIC etc.)	20
beneIdno	Alpha Numeric	No	Beneficiary Identification Number	20
benName	Alpha Numeric	yes	Full Name of Beneficiary as per their ID /	60

			Title of Account.	
benFathername	Alpha Numeric	No	This field could be used to supply beneficiary's father name.	60
beneCellno	Alpha Numeric	No	Beneficiary Cell Number	15
beneAddress1	Alpha Numeric	No	Beneficiary Address Line 1	100
beneAddress2	Alpha Numeric	No	Beneficiary Address Line 2	100
beneAddress3	Alpha Numeric	No	Beneficiary Address Line 3	100
beneDob	Alpha Numeric	No	This field could be to supply Beneficiary Date of Birth Date Format : DD-MM-YYYY	10
benePob	Alpha Numeric	No	This field could be to supply Beneficiary Place of Birth	30
beneCity	Alpha Numeric	No	Beneficiary City Name	30
beneProvince	Alpha Numeric	No	Beneficiary Province	30
beneEmail	Alpha Numeric	No	Beneficiary Email Address	30
beneBankcode	Alpha Numeric	No	Beneficiary Bank Code as per 1 Link List (Attached)	10
beneBankname	Alpha Numeric	No	Name of Bank where Beneficiary Account is maintained E.g.,	30
bankAccountnumber	Alpha Numeric	No	Beneficiary Account Number For COC this should be empty string.	24
transactionDescription	Alpha Numeric	No	Transaction Description	30
remarks	Alpha Numeric	No		30
remitTime	Alpha Numeric	No	Format: Feb-20-2023 10:08:23 AM	25

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A

remittancecurrencyCode	Alpha Numeric	yes	Currency Code of Remitting Currency ISO Standard	3
remittingAmount	Numeric	No	Amount in Remitting Currency	16
amountPkr	Numeric	yes	Amount to be paid to Beneficiary in Pak Rupees. Amount PKR should not be empty, if empty amount is supplied, API will return response Invalid amount. Amount PKR should be in numeric format. If non-numeric characters other than decimal are supplied in Amount PKR API will return invalid amount format. Amount PKR value should be greater than zero. If value is not greater than zero API will return response Invalid Amount	16
amountinWord	Alpha Numeric	No	Amount in Words	100
remittCharges	Numeric	No	Remittance charges charged from Remitter	16
remittPurpose	Alpha Numeric	yes	Purpose of Remittances as "Home Remittance"	30
senderCountry	Alpha Numeric	yes	Transaction Originating Country	50

benefidnoType	Alpha Numeric	No	Type of ID for beneficiary (e.g. Passport / CNIC etc.)	20
benefidno	Alpha Numeric	No	Beneficiary Identification Number	20
benName	Alpha Numeric	yes	Full Name of Beneficiary as per their ID / Title of Account.	60
benFathername	Alpha Numeric	No	This field could be used to supply beneficiary's father name.	60
benefCellno	Alpha Numeric	No	Beneficiary Cell Number	15
benefAddress1	Alpha Numeric	No	Beneficiary Address Line 1	100
benefAddress2	Alpha Numeric	No	Beneficiary Address Line 2	100
benefAddress3	Alpha Numeric	No	Beneficiary Address Line 3	100
benefDob	Alpha Numeric	No	This field could be to supply Beneficiary Date of Birth Date Format : DD-MM-YYYY	10
benefPob	Alpha Numeric	No	This field could be to supply Beneficiary Place of Birth	30
benefCity	Alpha Numeric	No	Beneficiary City Name	30
benefProvince	Alpha Numeric	No	Beneficiary Province	30
benefEmail	Alpha Numeric	No	Beneficiary Email Address	30
remarks	Alpha Numeric	No		30
remitTime	Alpha Numeric	No	Format Feb-20-2023 10:08:23 AM	25
benefBankcode	Alpha Numeric	No	Beneficiary Bank Code as per 1 Link List (Attached)	10
benefBankname	Alpha Numeric	No	Name of Bank where Beneficiary Account is maintained E.g., Meezan Bank	30
bankAccountnumber	Alpha Numeric	yes	This field can accept IBAN only .Length should not exceed 24 characters	24
transactionDescription	Alpha Numeric	No	Transaction Description	30

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
requestNumber	Numeric	A request number will be generated to identity each transaction
responseCodeDesc	Alpha Numeric	For Response Message Refer to Appendix A
companyId	Numeric	As a response, same company id will be send which was send in request.

Sample Request and Response

6. LOCAL FUNDS TRANSFER (LODGE ADVICE) SERVICE

URL: <https://{Server}:{PORT}/Title-Fetch/>

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
requestNumber	Alpha Numeric	A request number that was generated in title fetch will be used as input
transactionDate	Alpha Numeric	Transaction date is the date, when request for title fetch was made
transactionCode	Alpha Numeric	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN
companyId	Numeric	Company ID is unique ID assigned to each company by the bank.

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
requestNumber	Numeric	A request number will be returned
responseCodeDesc	Alpha Numeric	For Response Message Refer to Appendix A
companyId	Numeric	As a response same company id will be send which was send in request.
title	Alpha Numeric	Title of the beneficiary
tranRequestDate	Alpha Numeric	Date of the transaction

Sample Request and Response

REQUEST	RESPONSE
<pre> { "requestno": "37065876", "transactionDate": "09-22-2022", "transactionCode": "112321", "companyId": 1 } </pre>	<pre> { "responseCode": 0, "requestNumber": 37065876, "responseCodeDesc": "TITLE FETCH SUCCESS", "companyId": 1, "title": "20610-714-561792", "tranRequestDate": "09-28-2022" } </pre>

7. INTER BANK FUNDS TRANSFER (TITLE FETCH) SERVICE

URL: <https://{Server}:{PORT}/IBFT/Title-Fetch/>

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

FIELD NAME	FIELD TYPE	MANDATORY	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	yes	Company ID is unique ID assigned to each company by the bank.	
remittercompanyName	Alpha Numeric	yes	Remitting company's name	12
transactionCode	Alpha Numeric	yes	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN	30
remitteridnoType	Alpha Numeric	yes	This field could be used to supply remitter ID number Type such as Passport Number / Work Permit e.t.c.	20
remitterId	Alpha Numeric	yes	This field could be used to supply unique remitter ID.	20
remitterCode	Alpha Numeric	No	Any Unique number assigned to the Remitter by the Agent.	15
remitterDob	Alpha Numeric	No	This field could be used to supply remitter DOB . Date Format : DD-MM-YYYY	10

remitterPob	Alpha Numeric	No	This field could be used to supply remitter POB	30
remitterName	Alpha Numeric	yes	Full Name of Remitter. Remitter Name should not be empty. If empty remitter name is supplied API will return response Missing remitter Name.	60
remitterfatherName	Alpha Numeric	No	This field could be used to supply remitter Father Name.	60
remitterCell	Alpha Numeric	No	Remitter Cell Number	15
remitterEmail	Alpha Numeric	No	Remitter Email Address	30
remitterAddress1	Alpha Numeric	No	Remitter Address Line 1	100
remitterAddress2	Alpha Numeric	No	Remitter Address Line 2	100
remitterpostalCode	Alpha Numeric	No	Remitter Postal Code	5
remitterCity	Alpha Numeric	No	Remitter City Name	50
remitterAgent	Alpha Numeric	No	Agent unique provided	30

remitterProvince	Alpha Numeric	No	Remitter Province / State Name	30
remitterMessage	Alpha Numeric	No	This field could be used to send any message sent by Remitter	16
remitterCNIC	Alpha Numeric	No		13
remitteraccountNumber	Alpha Numeric	No	This field could be used to supply account number used by the remitter for remitting the funds.	24
remittancecurrencyCode	Alpha Numeric	yes	Currency Code of Remitting Currency ISO Standard	24
remittingAmount	Numeric	No	Amount in Remitting Currency	16,3
amountPkr	Numeric	yes	Amount to be paid to Beneficiary in Pak Rupees. Amount PKR should not be empty, if empty amount is supplied, API will return response Invalid amount. Amount PKR should be in numeric format. If non-numeric characters other than decimal are supplied in Amount PKR API will return invalid amount format. Amount PKR value should be greater than zero. If value is not greater than zero API will return response Invalid Amount	16,3
amountinWord	Alpha Numeric	No	Amount in Words	100
remittCharges	Numeric	No	Remittance charges charged from Remitter	16,3

remittPurpose	Alpha Numeric	yes	Purpose of Remittances as “Home Remittance”	30
senderCountry	Alpha Numeric	yes	Transaction Originating Country	50
beneidType	Alpha Numeric	No	Type of ID for beneficiary (e.g. Passport / CNIC etc.)	20
beneIdno	Alpha Numeric	No	Beneficiary Identification Number	20
benName	Alpha Numeric	yes	Full Name of Beneficiary as per their ID / Title of Account.	60
benFathername	Alpha Numeric	No	This field could be used to supply beneficiary’s father name.	60
beneCellno	Alpha Numeric	No	Beneficiary Cell Number	15
beneAddress1	Alpha Numeric	No	Beneficiary Address Line 1	100
beneAddress2	Alpha Numeric	No	Beneficiary Address Line 2	100
beneAddress3	Alpha Numeric	No	Beneficiary Address Line 3	100

beneDob	Alpha Numeric	No	This field could be to supply Beneficiary Date of Birth Date Format : DD-MM-YYYY	100
benePob	Alpha Numeric	No	This field could be to supply Beneficiary Place of Birth	10
beneCity	Alpha Numeric	No	Beneficiary City Name	30
beneProvince	Alpha Numeric	No	Beneficiary Province	30
beneEmail	Alpha Numeric	No	Beneficiary Email Address	30
beneBankcode	Alpha Numeric	yes	Beneficiary Bank Code as per 1 Link List (Attached). In case of COC transactions for other banks like (ABL,MCB) it will be mandatory	10
beneBankname	Alpha Numeric	yes	In case of COC transactions for other banks like (ABL,MCB) it will be mandatory	30
bankAccountnumber	Alpha Numeric	Yes	This field can accept IBAN only .Length should not exceed 24 characters. In case of COC transactions for other banks like (ABL,MCB) it will be not be mandatory field.	24
transactionDescription	Alpha Numeric	No	Transaction Description	30

remarks	Alpha Numeric	No		30

8. INTER BANK FUNDS TRANSFER (LODGE ADVICE) SERVICE

URL: `https://{Server}:{PORT}/IBFT/lodgeadvice/`

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
requestNumber	Alpha Numeric	A request number that was generated in title fetch will be used as input
transactionDate	Alpha Numeric	Transaction date is the date, when request for title fetch was made
transactionCode	Alpha Numeric	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN
companyId	Numeric	Company ID is unique ID assigned to each company by the bank.

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
responseMessage	Alpha Numeric	For Response Message Refer to Appendix A

Sample Request and Response

REQUEST	RESPONSE
<pre>{ "requestno": "37065876", "transactionDate": "09-22-2022", "transactionCode": "11232f", "companyId": 1 }</pre>	<pre>{ "responseCode": 0, "responseMessage": "Request has been executed successfully" }</pre>

9. BALANCE INQUIRY SERVICE

URL: `https://{Server}:{PORT} /BalanceInquiry/{companyid}`

Method: POST

Input Parameters

*Token will be sent in Authentication parameter

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
responseMessage	Alpha Numeric	For Response Message Refer to Appendix A
balance	Numeric	Current balance of the account
iban	Alpha Numeric	The iban of vostro account
Title	Alpha Numeric	The Account of vostro account

Sample Request and Response

REQUEST	RESPONSE
companyid will be provided in the url as path variable	{ "responseCode": 0, "responseMessage": "successful", "Balance": 0, "Iban": " ", "Title": " ", }

10. TRANSACTION STATUS INQUIRY SERVICE

URL: https://{Server}:{PORT}/TransactionStatusInquiry/{companyId}/{transactionCode}

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
responseMessage	Alpha Numeric	For Response Message Refer to Appendix A

Sample Request and Response

REQUEST	RESPONSE
CompanyId and transactionCode will be provided in the url as path variable	{ "responseCode": 0, "responseMessage": "SUCCESSFUL" }

11. M-WALLET TITLE FETCH SERVICE

URL: https://{Server}:{PORT}/Wallet/TitleFetch

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

FIELD NAME	FIELD TYPE	MANDATORY	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	yes	Company ID is unique ID assigned to each company by the bank.	
remittercompanyName	Alpha Numeric	yes	Remitting company's name	12
transactionCode	Alpha Numeric	yes	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN	30
remitteridnoType	Alpha Numeric	yes	This field could be used to supply remitter ID number Type such as Passport Number / Work Permit e.t.c.	20
remitterId	Alpha Numeric	yes	This field could be used to supply unique remitter ID.	20
remitterCode	Alpha Numeric	No	Any Unique number assigned to the Remitter by the Agent.	15
remitterDob	Alpha Numeric	No	This field could be used to supply remitter DOB . Date Format : DD-MM-YYYY	10
remitterPob	Alpha Numeric	No	This field could be used to supply remitter POB	30
remitterName	Alpha Numeric	yes	Full Name of Remitter. Remitter Name should not be empty. If empty remitter name is supplied API will return response Missing remitter Name.	60
remitterfatherName	Alpha Numeric	No	This field could be used to supply remitter Father Name.	60
remitterCell	Alpha Numeric	No	Remitter Cell Number	15

remitterEmail	Alpha Numeric	No	Remitter Email Address	30
remitterAddress1	Alpha Numeric	No	Remitter Address Line 1	100
remitterAddress2	Alpha Numeric	No	Remitter Address Line 2	100
remitterpostalCode	Alpha Numeric	No	Remitter Postal Code	5
remitterCity	Alpha Numeric	No	Remitter City Name	50
remitterAgent	Alpha Numeric	No	Agent unique provided	30
remitterProvince	Alpha Numeric	No	Remitter Province / State Name	30
remitterMessage	Alpha Numeric	No	This field could be used to send any message sent by Remitter	60
remitterCNIC	Alpha Numeric	No		13
remitteraccountNumber	Alpha Numeric	No	This field could be used to supply account number used by the remitter for remitting the funds.	24
remittancecurrencyCode	Alpha Numeric	yes	Currency Code of Remitting Currency ISO Standard	3
remittingAmount	Numeric	No	Amount in Remitting Currency	16,3
amountPkr	Numeric	yes	Amount to be paid to Beneficiary in Pak Rupees. Amount PKR should not be empty, if empty amount is supplied, API will return response Invalid amount. Amount PKR should be in numeric format. If non-numeric characters other than decimal are supplied in Amount PKR API will return invalid amount format. Amount PKR value should be greater than zero. If value is not greater than zero API will return response Invalid Amount	16,3
amountinWord	Alpha Numeric	No	Amount in Words	100
remittCharges	Numeric	No	Remittance charges charged from Remitter	16,3
remittPurpose	Alpha Numeric	yes	Purpose of Remittances as “Home Remittance”	30

senderCountry	Alpha Numeric	yes	Transaction Originating Country	50
beneidnoType	Alpha Numeric	No	Type of ID for beneficiary (e.g. Passport / CNIC etc.)	20
beneIdno	Alpha Numeric	No	Beneficiary Identification Number	20
benName	Alpha Numeric	yes	Full Name of Beneficiary as per their ID / Title of Account.	60
benFathurname	Alpha Numeric	No	This field could be used to supply beneficiary's father name.	60
beneCellno	Alpha Numeric	No	Beneficiary Cell Number	15
beneAddress1	Alpha Numeric	No	Beneficiary Address Line 1	100
beneAddress2	Alpha Numeric	No	Beneficiary Address Line 2	100
beneAddress3	Alpha Numeric	No	Beneficiary Address Line 3	100
beneDob	Alpha Numeric	No	This field could be to supply Beneficiary Date of Birth Date Format : DD-MM-YYYY	10
benePob	Alpha Numeric	No	This field could be to supply Beneficiary Place of Birth	30
beneCity	Alpha Numeric	No	Beneficiary City Name	30
beneProvince	Alpha Numeric	No	Beneficiary Province	30
beneEmail	Alpha Numeric	No	Beneficiary Email Address	30
beneBankcode	Alpha Numeric	yes	Beneficiary Bank Code as per 1 Link List (Attached in Annexure). For wallet transfers it is mandatory to mention bank code.	10
beneBankname	Alpha Numeric	yes	Name of Bank where Beneficiary Account is maintained E.g., Ubank, Easy Paisa/Telenor MF, Mobilink MF/Jazz Cash, etc. For wallet transfers it is mandatory to mention bank code.	30
mWalletAccountnumber	Alpha Numeric	yes	This field can accept Mobile Number for M-Wallet accounts .Length should not exceed 30 characters. For wallet transfers it is mandatory to mention bank code.	30
transactionDescription	Alpha Numeric	No	Transaction Description	30
remarks	Alpha Numeric	No	If any	30

remitTime	Alpha Numeric	No	Format Feb-20-2023 10:08:23 AM	25
-----------	---------------	----	-----------------------------------	----

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
requestNumber	Numeric	A request number will be generated to identity each transaction
responseMessage	Alpha Numeric	For Response Message Refer to Appendix A
companyId	Numeric	As a response same company id will be send which was send in request.
mWalletAccountNo	Alpha Numeric	M Wallet account number / IBAN
bicCode	Alpha Numeric	Bank identification code
bankName	Alpha Numeric	Bank Name

Sample Request and Response

REQUEST	RESPONSE

12. M-WALLET (LODGE ADVISE) SERVICE

URL: `https://{Server}:{PORT}/Wallet/LodgeAdvise`

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
requestNumber	Alpha Numeric	A request number that was generated in title fetch will be used as input
transactionDate	Alpha Numeric	Transaction date is the date, when request for title fetch was made.
transactionCode	Alpha Numeric	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN
companyId	Numeric	Company ID is unique ID assigned to each company by the bank.

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
responseMessage	Alpha Numeric	For Response Message Refer to Appendix A

Sample Request and Response

REQUEST	RESPONSE
<pre>{ "requestno": "37065876", "transactionDate": "09-22-2022", "transactionCode": "11232f", "companyId": 1 }</pre>	<pre>{ "responseCode": 0, "responseMessage": "Request has been executed successfully" }</pre>

13. TITLE FETCH REQUEST

URL:https://{Server}:{PORT}/Title-Fetch/

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

FIELD NAME	FIELD TYPE	MANDATORY	FIELD DESCRIPTION	FIELD LENGTH
companyId	Numeric	yes	Company ID is unique ID assigned to each company by the bank.	8
amountPkr	Numeric	yes	Amount to be paid to Beneficiary in Pak Rupees. Amount PKR should not be empty, if empty amount is supplied, API will return response Invalid amount. Amount PKR should be in numeric format. If non-numeric characters other than decimal are supplied in Amount PKR API will return invalid amount format. Amount PKR value should be greater than zero. If value is not greater than zero API will return response Invalid Amount	16
beneBankcode	Alpha Numeric	yes	Beneficiary Bank Code as per 1 Link List (Pl. Refer Annexure B-1)	8
bankAccountnumber	Alpha Numeric	yes	This field can accept IBAN only .Length should not exceed 24 characters	24
beneBankname	Alpha	yes	Beneficiary Bank Name as per 1 Link List (Pl. Refer Annexure B-1)	10
remitterName	Alpha Numeric	yes	This field could be used to supply unique remitter ID.	60
remitterID	Alpha Numeric	yes	This field could be used to supply remitter ID number Type such as Passport Number / Work Permit e.t.c.	60
remitterCountry	Alpha Numeric	yes	Transaction Originating Country – Only ISO Alpha 3 will be accepted	3
remitterIBAN	Alpha Numeric	No	This field could be used to supply account number used by the remitter for remitting the funds.	24
beneName	Alpha Numeric	yes	Full Name of Beneficiary as per their ID / Title of Account.	60

beneID	Alpha Numeric	yes	Beneficiary Identification Number – Can be sent Empty incase information not available	60
benePhone	Alpha Numeric	No	Beneficiary Cell Number	15
transactionCode	Alpha Numeric	yes	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN	36

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
responseCode	Numeric	For Response Code Refer to Appendix A
requestNumber	Numeric	A request number will be generated to identity each transaction
responseMessage	Alpha Numeric	For Response Message Refer to Appendix A
responseCodeDesc	Alpha Numeric	For Response Message Refer to Appendix A
companyId	Numeric	As a response same company id will be send which was send in request.
title	Alpha Numeric	The Account of vostro account
Iban	Alpha Numeric	The iban of vostro account
bicCode	Numeric	Bank identification code
tranRequestDate	Date	Date of the transaction
bankName	Alpha Numeric	Bank Name

15. Cash Over Counter (COC) Cancellation

URL: `https://{Server}:{PORT}/cancel-tran`

Method: POST

Input Parameters

*Token will be sent in Authentication parameter

Request

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
companyID	Numeric	Company ID is unique ID assigned to each company by the bank.
transactionCode	Alpha Numeric	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
companyID	Numeric	Company ID is unique ID assigned to each company by the bank.
responseCode	Numeric	For Response Code Refer to Appendix A
responseDesc	Alpha Numeric	For Response Code Refer to Appendix A

Sample Request and Response

REQUEST	RESPONSE
<pre> { "companyID": "7", "transactionCode": "TestTran1111" } </pre>	<pre> { "companyId": 7, "responseCode": 6, "responseDesc": "Transaction cancelled successfully" } </pre>

16. Cash Over Counter (COC) Beneficiary Name Amendment Service

URL: `https://{Server}:{PORT}/amend-tran`

Method: POST

Input Parameters

***Token will be sent in Authentication parameter**

Request

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
companyID	Numeric	Company ID is unique ID assigned to each company by the bank.
transactionCode	Alpha Numeric	Unique secret code (PIN) used for identification of receiver at the time of Payment. Supplied PIN should not be duplicate for same agent. If duplicate PIN is supplied by same agent API returned response Duplicate PIN
beneName	Alpha Numeric	Full Name of Beneficiary as per their ID / Title of Account.

Response

FIELD NAME	FIELD TYPE	FIELD DESCRIPTION
companyID	Numeric	Company ID is unique ID assigned to each company by the bank.
responseCode	Numeric	For Response Code Refer to Appendix A
responseDesc	Alpha Numeric	For Response Code Refer to Appendix A

Sample Request and Response

REQUEST	RESPONSE
<pre>{ "companyID" : 7, "transactionCode" : "TestTran1111", "beneName":"Faraz ur Rehman" }</pre>	<pre>{ "companyId": 7, "responseCode": 5, "responseDesc": "Transaction amended successfully" }</pre>

Note: In case of Title Fetch failure, transaction can be transmitted to HabibMetro by inputting “0” in the “requestNumber” field at Lodge Advice Service.

APPENDIX A

RESPONSE CODE	DETAIL DESCRIPTION
0	Successful
1	Unsuccessful
2	Your request has been lodge will take 24 hours for disbursement For other bank COC transactions lodge advise service will not be called & it will be processed manually & message will be received “Your request has been lodge will take 24 hours for disbursement”
3	Duplicate transaction code
22	<u>Transaction status inquiry service</u> Following response code will be appeared when title fetch service is successfully lodged and no lodge advise service request is sent then below mention message will be appeared “Transaction is pending for lodgement at exchange company end”.
99	<u>Transaction status inquiry service</u> Following code will be appeared when title fetch service is successfully lodged and upon using lodge advise service request any error occurred then below mention message will be appeared “Your request has been lodge and will be processed manually within 24 hours”.
5	Transaction amended successfully
6	Transaction cancelled successfully
